

Invest in WJXN Tokens at a discount

What are WJXN Tokens?

- Wrapped JAXNET (WJXN) tokens are the wrapped version of the JAXNET (JXN) token, the native utility token of the Jax.Network blockchain
- JXN is an asset and is used to pay for transaction fees, cross-shard transaction fees, and as an incentive for BTC miners to merge-mine the Jax.Network blockchain
- WJXN tokens currently run on Ethereum and BNB blockchain

Benefits of holding WJXN tokens

- WJXN tokens have a fixed issuance, which reduces over time. As more people begin using Jax.Network and Jax.Money for payments and transactions, there will be an increased demand for WJXN tokens
- WJXN tokens can be exchanged for Volatility Reserves Pool (VRP) tokens on Jax.Money. VRP token holders receive a yield for staking WJXN tokens

How do I buy WJXN tokens?

- To buy WJXN at a discounted price, scan the QR code provided below or follow this link: buy.jax.network/swap/locked-tokens
- Up to a 50% discount on locked WJXN depending on lockin period selected
- Minimum Investment: \$100 , Maximum Investment: \$100,000
